RELIA HORSESHOE / EQUESTRIAN MANUFACTURING

Horseshoe Nails & Farrier Tools

A product-family overview for wholesale buyers comparing nail references and related farrier-supply items.

Company	Brand	Location
Qingdao Relia Industries Co., Ltd.	Relia Horseshoe	Qingdao, Shandong, China

Nails and farrier-tool range

Horseshoe nails	The published range covers multiple nail models. Lengths and profiles are model-specific; confirm the exact reference and pack quantity by item.
Farrier tools	The official range includes hoof nippers, knives, rasps, trimming tools, brushes, kits and aprons. Confirm intended tool model, item specification and finish.
Shoe-and-nail matching	Share the horseshoe reference or a clear photo of the shoe and current nail packaging. Confirm the nail model and length against the selected shoe before ordering.

For nail enquiries, provide the horseshoe reference or a current sample/photo where possible. The team verifies model pairing and dimensions before confirming a recommendation.

How to specify nails and tools

A clear product brief helps the team review the correct catalogue reference, sample and order conditions.

01	**Identify the nail reference** Share the current model or series, required length, head/profile details and a clear photo if the reference is unknown.
02	**Confirm the shoe pairing** Provide the horseshoe model or a shoe photo so the technical details can be checked together; do not assume compatibility from size alone.
03	**Set pack and order quantities** State units per box or preferred presentation, quantities by model, any label requirement and delivery destination.
04	**Specify each tool separately** For farrier tools, list the item/model and required finish or packaging. Commercial terms are confirmed for the selected products and destination.

Before confirming an order

Product specifications, minimum quantities, samples, lead times, packing and delivery terms are confirmed for the selected item and destination. A listed product family is not a guarantee of stock, compatibility or a fixed commercial term.
