To request a quote, include:

Packed material · target load · size/drawing · filling/discharge · loops · quantity · destination

* Website reference only. Confirm current specification, SWL/SF, MOQ, documents and availability for the actual order.

Start with the handling task

A usable FIBC quotation starts with the material and equipment interface. Send the details you know; mark the rest as questions for review.

01 PACKED MATERIAL

Name the product; note particle form, moisture sensitivity, dust or ventilation needs.

02 CAPACITY & SIZE

Share target fill weight, dimensions with units, or a controlled drawing.

03 FILLING & DISCHARGE

Specify inlet, outlet, closures and the equipment connection dimensions.

04 LIFTING & HANDLING

Show loop number, position, length, lifting method and available clearance.

05 MATERIAL OPTIONS

State coating, separate liner, fabric finish, printing and document requirements.

06 ORDER & DELIVERY

Give quantity, destination, required date, packing and delivery term for quotation.
